

MMA WELDING SUPER PLUS 120 GE K

ADVANTAGES

- Electric arc welding equipment for all kinds of coated electrodes.
- Professional duty cycle: 100% with 30°C air
- Includes all the accesories needed to easily start welding.
- Ready for special TIG welding with tungsten electrodes in an inert atmosphere.
- Best suited for light and medium tasks like maintenance, construction and DIY.
- Unmatched features compared to similar tools from other brands: continuous 120A, vacuum voltage =64Vdc.
- Includes a professional cooling system with thermal stability and maximum performance on its range.
- Easy welding, thanks to the intelligent STAYER WELDING control including Hot Start, Arc Force & Anti Stick to improve the initial arcing, increase the welding stability while avoiding the electrode sticking due to improper use.
- Ready for safe use with stabilized generators.
- Solid construction according to the european regulations 2011/65/EU, 2014/35/EU, 2014/30/EU e IEC 60974.
- Max power density: the lightest equipment on it's category: only 1.9 Kg.

Non stop welding with
3.2 mm **ELECTRODES**

High quality
welding

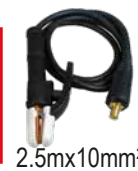

FEATURES

Power (A, X=100%, 30°C)	120	A
Electrode (mm)	3.2	mm
Weight (kg)	1.9	kg
Voltage (V)	230	V
Generator (KVA)	3 - 5	KVA
Size (cm)	23.5 x 15.5 x 9	cm

EQUIPMENT

- Power cable. 2m x 1.5 mm²
- Ground cable with clamps. 1.5m x 10 mm²
- Electrode cable. 2.5m x 10 mm²
- Hammer with brush
- Carry case
